

DISASTER RECOVERY × HLE × ECF

The Disaster-to-Blessing Workflow

An enhancement to the DR referral flow that solves the **contractor insolvency gap** left by failing 3rd-party panels — turning a \$200k claim into a full financial restructure for the homeowner.

01

The Incident

Burst pipe flood at Mrs Susan Johnson's home

1

Mrs Johnson's Home

Upstairs bathroom pipe bursts. Water damage through ceilings, walls and floors.

2

AAMI Notified

Estimated claim: **\$200,000+**. Urgent make-safe required.

3

Immediate Response Needed

Plumber, make-safe crew, drying, mould prevention — all required in hours, not weeks.

02

The Broken Status Quo

Why the traditional 3rd-party panel model is failing

**AAMI**

pays claim

**3rd Party Panel**

Johns Lyng · AJ Grant · Claims Central

⚠️ 2 in administration

**Contractors**

Wait up to 6 months. If panel fails — they're never paid.

Plumber

Disaster Recovery

Builder / Carpentry

Painter

Sparky

The earliest contractors in (make-safe, cleaning) are the last to get paid — held hostage by the "final brush stroke" of the painter six months later. If the panel collapses mid-project, the insurer has already paid, the homeowner owes nothing, and the contractor wears the loss.

03

The XYZ P/L Capital Pool

A licensed, ring-fenced funding vehicle

LENDERS / AGGREGATORS

\$100k

Tranches of ~\$50k each

CONTRACTORS

\$10k

Skin-in-the-game stake

BROKERS (HLE)

\$20k

Aligned participation

Dir C

GOVERNANCE

Fiduciary duty · 12-month panel review

04

The Live Workflow

From job load to financial blessing

1

Contractor loads the job

Approved contractor logs into the DR app and invites Mrs Johnson (name, address, email) into the project.

2

Susan consents

Ticks T&Cs acknowledging a call from the lender within 72 hours. Referral hand-off triggered via Phill's signed JWT flow.

3

**Pool funds the work**

Approved contractor draws from XYZ P/L to begin make-safe and early-stage work immediately — no waiting on a 3rd-party PO.

4

**HLE calls Susan**

Within the 72-hour window. Not a repair call — a wealth conversation. Equity top-up to clear disaster costs, new kitchen, credit cards, school fees.

5

**Pool replenished**

Repayment flows back to XYZ P/L via one or a mix of: (1) HLE settled loan, (2) AAMI insurance payout, (3) Susan's savings.

05

Three Paths of Reimbursement

Mrs Johnson settles the pool — single or blended

1

HLE Home Loan Top-Up

The strategic path. Full restructure — repairs + lifestyle + debt consolidation. The "blessing".

2

AAMI Insurance Payout

Direct reimbursement once the claim is processed — bypassing the 3rd-party panel risk entirely.

3

Susan's Savings

For high-liquidity clients preferring not to borrow.

06

The Approved Panel

Aggregators

Approved Contractor Panel

Every contractor accessing the pool passes the **15-point "Responsible Person" check** — licensing, credit file, insurance, past performance. Directors of XYZ P/L approve each draw-down.

THE OUTCOME

A \$200k disaster becomes *a lifetime financial blessing.*

Contractors paid on day one. The homeowner refinanced into a better position. The lender writes a quality loan. The broker earns a clean referral. The insurer's claim lands without panel-risk exposure.
